

SAP® certified integration in a nutshell

Your MES project puts high demands on the functionality of a subsystem. You expect optimal connectivity with your SAP® system. **cronetwork**® offers you precisely this perfect information flow between the systems. Many international users attest to the reliability and performance of **cronetwork**®. With the certification of our SAP® connectors, SAP AG officially documents the professionalism of our solutions.

SAP certified integration

Your benefits

Compared to the frequently used PP-PDC couplings that were conceived years ago for conventional PDC applications, our ABAP add-on interface offers the following additional features:

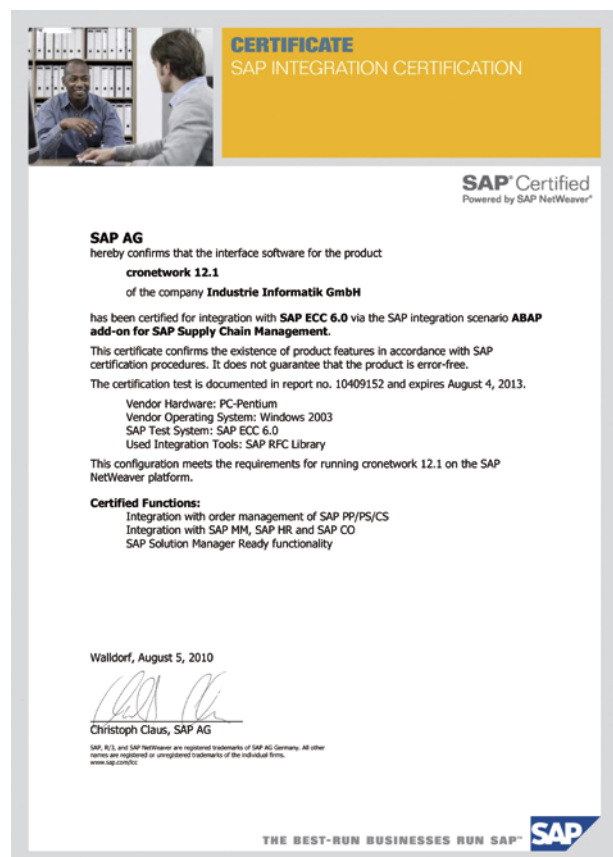

- Download of order heads, component requirements, production aids, tooling attributes, technologies, long texts, warehouse stock status, HR data, etc.
- Correction of any contents, even for already transferred feedback
- Workplace-specific, configurable transfer logic for uploading feedback, e.g., transfer quantities immediately, evaluate personnel times once daily
- Transfer of planned completion deadlines to SAP®
- Transfer of warehouse transactions to SAP®
- Triggering of resource availability test
- Record-wise, transaction-oriented processing between **cronetwork**® and SAP®

Thus our ABAP add-on certification offers you the benefits of the proven performance and project flexibility of our SAP® connectors while assuring system reliability in SAP®.

We meet your demands for quality and functionality with the following measures:

- Annual recertification of connectors
- Tool-supported development of our connectors to enable you to install via Saint, to monitor namespaces and object lists, etc.

SAP® Certified Powered by SAP NetWeaver®

The certification of our SAP® connectors and the integration and application know-how of our employees safeguard your investment.

Our company

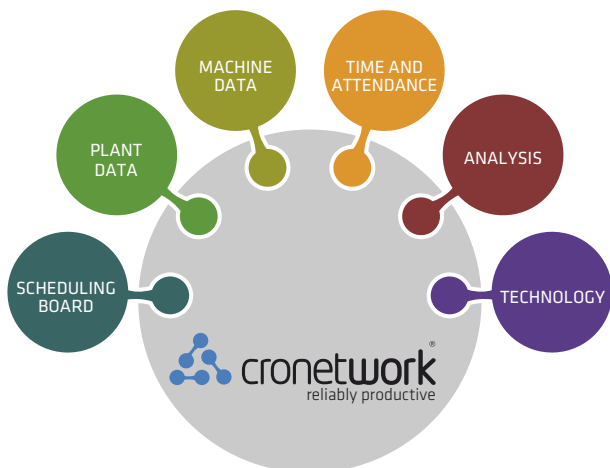

reliable
competent
international
partner-oriented
high-performance

With its **cronetwork**[®] product family, Industrie Informatik has established itself as a leading vendor for **MES (Manufacturing Execution Systems)** on the central European market.

The human and technical competency of our employees, continuity and our partner-oriented behavior toward our customers, employees and suppliers create an environment in which the realization of complex projects succeeds optimally.

The solution is more than the sum of the components.

The integration

The standard software **cronetwork**[®] is a scalable information and management system that particularly emphasizes the sensible interplay of individual components and full release compatibility.

Functionally and technically high-quality solutions that are reliable and intuitive to operate open new opportunities in production organization.

As a connector between leading ERP systems and your production, **cronetwork**[®] is optimally embedded in your IT infrastructure.

Our services

Prerequisites for the extremely high acceptance of our solutions are our tested procedures in:

- analysis
- consultation and
- implementation

Our know-how in the field of production logistics and the holistic thinking of our consultants complement our solution competence.

Our key to success

- 100 % worldwide IT standards
- 100 % hardware independence
- 100 % integration
- 100 % Oracle
- 100 % technology leadership
- 100 % customer satisfaction
- 100 % multilingual
