

cronetwork® machine data in a nutshell →

cronetwork® machine data is a high-performance system for automatic transfer of data on machine states, piece counts and processes. Providing and evaluating up-to-date information about machines provides you with decisive benefits to optimally exploit your capacity potential.

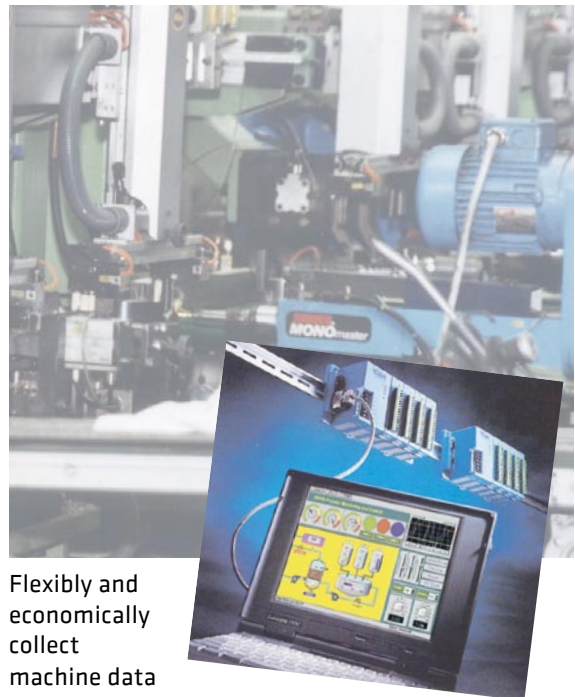

machine data

Your benefits →

- **You achieve more transparency in your production.**
cronetwork® machine data enables you to have complete evaluations and statistics on machine data. These data serve as the basis for key performance indicators.
- **You minimize the cost of idle times.**
The collection of time-related performance and state data makes it easier to detect weak points and so to improve efficiency and economy.
- **You relieve your employees.**
Through automatic transfer of machine data, **cronetwork®** supports your employees in plant data collection and largely preclude input errors.
- **You work economically and flexibly.**
cronetwork® collects machine data without expensive conventional PDC terminals. Extensive variants in parameterizing and scaling assure flexible and adaptive application possibilities.
- **You optimize your capacity utilization.**
cronetwork® lets you objectively collect machine capacity utilization, whether or not the machine is equipped with controls. By protocolling operation times, **cronetwork®** machine data provides reliable information about the actual utilization of machines.

- **You receive meaningful information from your data.**

The collected data are provided in standardized form and are easily and effectively evaluated. As an optimal complement of **cronetwork®** machine data, the query tool **cronetwork®** production info enables you to set up your own evaluations and analyses, e.g., for utilization or for causes of failures or waste.

Flexibly and economically collect machine data

Our company

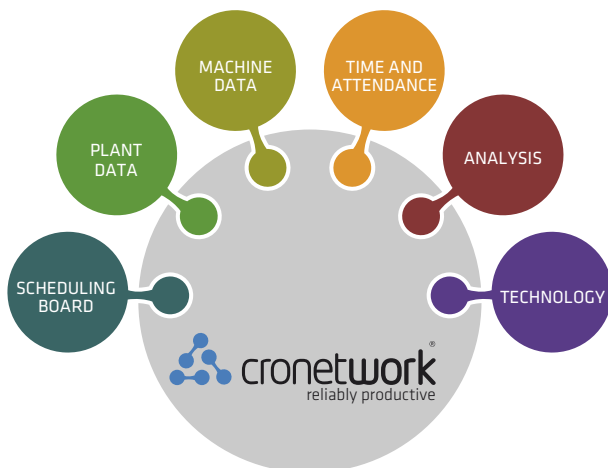

reliable
competent
international
partner-oriented
high-performance

With its **cronetwork**® product family, Industrie Informatik has established itself as a leading vendor for **MES (Manufacturing Execution Systems)** on the central European market.

The human and technical competency of our employees, continuity and our partner-oriented behavior toward our customers, employees and suppliers create an environment in which the realization of complex projects succeeds optimally.

The solution is more than the sum of the components.

The integration

The standard software **cronetwork**® is a scalable information and management system that particularly emphasizes the sensible interplay of individual components and full release compatibility.

Functionally and technically high-quality solutions that are reliable and intuitive to operate open new opportunities in production organization.

As a connector between leading ERP systems and your production, **cronetwork**® is optimally embedded in your IT infrastructure.

Our services

Prerequisites for the extremely high acceptance of our solutions are our tested procedures in:

- analysis
- consultation and
- implementation

Our know-how in the field of production logistics and the holistic thinking of our consultants complement our solution competence.

Our key to success

- 100 % worldwide IT standards
- 100 % hardware independence
- 100 % integration
- 100 % Oracle
- 100 % technology leadership
- 100 % customer satisfaction
- 100 % multilingual
