

cronetwork® plant data in a nutshell →

Complete transparency and up-to-date production data are decisive for on-deadline, optimized shop management.

cronetwork® plant data is a powerful information system for your production that enables you to optimize your competitiveness.

plant data

Your benefits →

- **The data lend transparency in your production.** **cronetwork®** serves you at any time with complete collection and evaluation of production data such as times, quantities, and quality data. Your complete overview of production is only a mouse click away.
- **You can flexibly design reporting procedures.** Simple parameterization individually adapts **cronetwork®** plant data to your organizational requirements. The functionality of each terminal, each workplace can be freely parameterized.
- **You profit from complete order and charge tracking.** You can precisely follow which material is in which product and who produced which charge when.
- **You simplify your paper logistics.** By printing working papers directly at the workplace, you reduce the flood of paperwork. Even for short-order modifications, the worker has the correct version at hand. Test protocols, palette documents, article labels, etc. are automatically printed with PDC reports.
- **You profit from integration opportunities.** Integration compatibility with **cronetwork®** time & attendance enables a common view of work times and performance times. On the basis of collected PDC reports, **cronetwork®** incentive pay can calculate productivity or bonus values for employee payment.
- **You save time and avoid redundant data input.** Core data can be imported from third-party systems, and order data can be imported and report results can be exported.
- **You improve the quality of your data.** **cronetwork®** plant data provides only context-sensitive, logically correct input fields and simplifies operation by proposing automatic default values and opening lists of valid values. Extensive plausibility tests guarantee high data quality.
- **You vest in high acceptance by your employees.** **cronetwork®** is equipped with a user-friendly interface. Its simple, intuitive operation and individual user-specific settings simplify daily work and assure the quick success of software introduction.

Industrial PC as PDC terminal

Our company

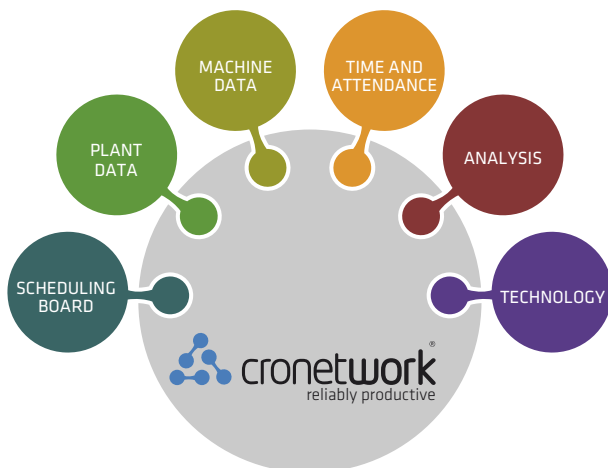

reliable
competent
international
partner-oriented
high-performance

With its **cronetwork**[®] product family, Industrie Informatik has established itself as a leading vendor for **MES (Manufacturing Execution Systems)** on the central European market.

The human and technical competency of our employees, continuity and our partner-oriented behavior toward our customers, employees and suppliers create an environment in which the realization of complex projects succeeds optimally.

The solution is more than the sum of the components.

The integration

The standard software **cronetwork**[®] is a scalable information and management system that particularly emphasizes the sensible interplay of individual components and full release compatibility.

Functionally and technically high-quality solutions that are reliable and intuitive to operate open new opportunities in production organization.

As a connector between leading ERP systems and your production, **cronetwork**[®] is optimally embedded in your IT infrastructure.

Our services

Prerequisites for the extremely high acceptance of our solutions are our tested procedures in:

- analysis
- consultation and
- implementation

Our know-how in the field of production logistics and the holistic thinking of our consultants complement our solution competence.

Our key to success

- 100 % worldwide IT standards
- 100 % hardware independence
- 100 % integration
- 100 % Oracle
- 100 % technology leadership
- 100 % customer satisfaction
- 100 % multilingual
