

# cronetwork® production info in a nutshell

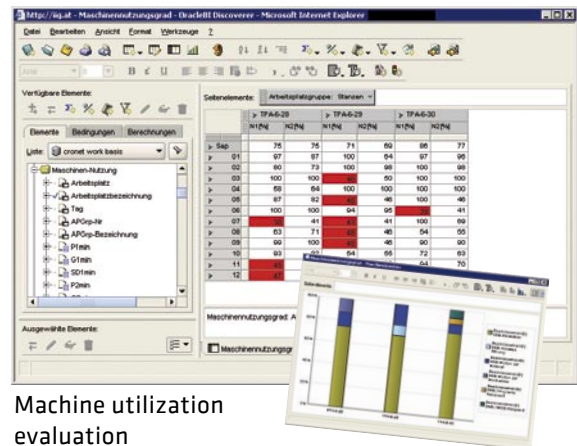

cronetwork® production info provides production data information in management-oriented form at the right time and place. Analyses such as capacity utilization, causes of failures or waste, machine operation times and degree of utilization are yours at the push of a button for a well-founded basis for decisions.

## production info

### Your benefits

- **You extract information from data.**  
With a single interface for queries, analyses and graphic representation you transform data into information.
- **As a user, you prefer comfort.**  
The simple user interface requires no special computer skills. You work via a wizard interface with management terms rather than technical terminology.
- **You reach your data without detours.**  
End the frustration over the effort required to enter data manually in spreadsheets! Automate your reporting with cronetwork® production info.
- **You standardize your reporting.**  
The constantly rising demand for information in departments has led many companies to wild growth of query tools. This can be prevented by separating data preparation and data presentation.
- **You relieve your IT department.**  
Data preparation on the basis of a solid metamodel is a reliable, good investment in your IT department. As IT manager, you thereby provide other departments with controlled access to information. Your investment begins to pay off with the first reports created autonomously by the departments.
- **You save valuable time.**  
As a basis for simple production of reports, cronetwork® provides prefabricated data models. This living documentation in the data structures brings you immediate benefits.
- **You control views on data.**  
A flexible authorization concept enables you to protect sensitive company data against unauthorized access.
- **You individually design your evaluations.**  
cronetwork® production info supports your justified need for individual evaluation and analysis. Reporting is flexible yet standardized. Results can be scaled and presented in a form that meets your requirements.

Machine utilization evaluation

## Our company

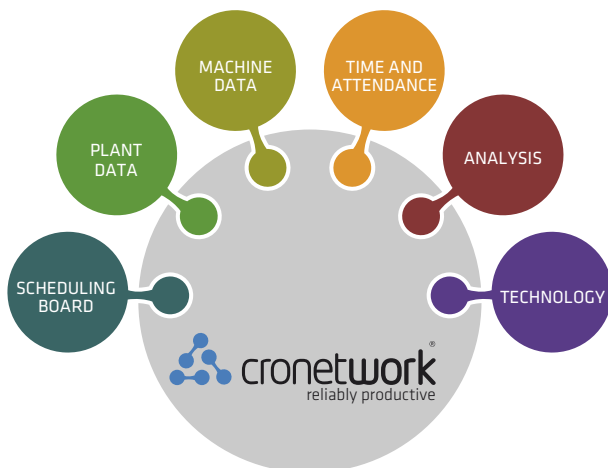

reliable  
competent  
international  
partner-oriented  
high-performance

With its **cronetwork**<sup>®</sup> product family, Industrie Informatik has established itself as a leading vendor for **MES (Manufacturing Execution Systems)** on the central European market.

The human and technical competency of our employees, continuity and our partner-oriented behavior toward our customers, employees and suppliers create an environment in which the realization of complex projects succeeds optimally.

# The solution is more than the sum of the components.

## The integration
